LABORJOURNAL online

The publishing house

» 30 Years of Laborjournal

When we started in 1994, we were unexperienced in journalism. And we knew little about publishing and distribution strategies, taxes and finances. But we had a great desire to start a magazine. And we were brave enough to do it. We left our previously chosen, fledgling career paths behind – and turned towards adventure. Financial help came from our partners and actually from the employment office. That was enough for living and eating. We were modest and got along with it.

In the beginning, we did almost everything ourselves: we researched, wrote, did the layout, helped with printing, collating and stitching – and finally delivered the booklets to the laboratories. But this also included the daily struggle with a 386 PC and the hard disks which were always far too small. The first removable hard drives that we used to transport our files to the prepress studio (on the bike) were able to store 20 Mb. There was no Internet and no ISDN yet (remember?). In order to establish a Germany-wide distribution, we obtained the course catalogues of all universities and contacted all institutes on the phone. Later, we set up our first computer network with Windows 3.0, and even later we created our first pioneering Internet presence.

Our most important achievement, however, is that we have established a high-quality and independent editorial team. Along the way, we created a common spirit that keeps the whole thing together to this day and shapes it stylistically. To this end, we have always found great authors and trained them ourselves. Many of them are still doing their own research in the laboratory and are therefore very close to our readers. In addition, year after year we are able to attract renowned authors for our summer edition – packed with essays, from the young avant-garde of the hottest research fields to the top of the major research organisations.

Today everything has become more routine. Many services have been handed over to professional hands. This enabled us to focus on the essentials. And indeed on further development. Over the years, **Laborjournal** has had two offshoots: **Laborjournal online** has become an independent medium. And the **Laborjournal newsletter** is just setting out to becoming a real success story.

As you can see: There is no resting. Not even after 30 years.

Over the years, our advertising clients have helped us to achieve this sustainable success. And they continue to help us maintain it. Because they're financing the whole thing. In return, they get regular and very direct contact with their customers, accompanied by competence and reading pleasure.

Here's to the next years!
